

2. RESULTS

Geranium Eclipse Red in the AgroCottem® beds have more blooms and the *Impatiens Accent White* are more vigorous. There is a very noticeable difference with the *Rudbeckia Marmelade*.

Fig. 1 'The Dell', bed C (AgroCottem®)

Fig. 2 'The Dell', bed D (Control)

Fig. 3 & 4 'The Dell', round beds (left: AgroCottem®; right: Control)

Marigold Solar Orange and *Cordyline* did particularly well with AgroCottem®.

The AgroCottem® - treated *Cordyline Red* are much bigger than the control ones. You can hardly see the ones in the control beds. The AgroCottem® - treated *Marigold Solar Sulphur* and *Salvia Victoria* are also doing better.

Fig. 5 & 6 'Large Burgoyne', (Left: bed H1 with AgroCottem®; right: bed H, control)

Fig. 7 & 8 'Large Burgoyne', (Left: bed B1 with AgroCottem®; right: bed B, control)

The AgroCottem - treated *Begonia Olympia Rose* are taller and have more blooms. The AgroCottem beds have a better coverage.

3. CONCLUSIONS

The AgroCottem® - treated beds did visibly better than the control ones (treated with a standard fertilizer). The plants in the AgroCottem® - treated beds were bigger, more vigorous and had more blooms.
